# How does it work?

# How do we do it?

**State-of-the-art equipment, 24/7 monitoring and weather-based programming creates healthier, more beautiful landscapes with controllers that adjust daily for precise plant needs and protect site assets.**

**Save Water** - Our systems save an average of 38% and are EPA WaterSense Certified.

**Save Money** - Protect plants and structures from damage resulting from over/under watering, reduce liability and avoid fines from watering violations.

**Protect People** - Avoid liability hazards like icy walkways & roads and other structural damage.

**System Visibility & Analysis** - Asset mapping, verified inspections & repairs & detailed reports

**24/7 Remote Access & Alert Monitoring** - Instant notification of issues like stuck valve & breaks

**Social Responsibility** - Conserve water, give back and contribute to global sustainability.

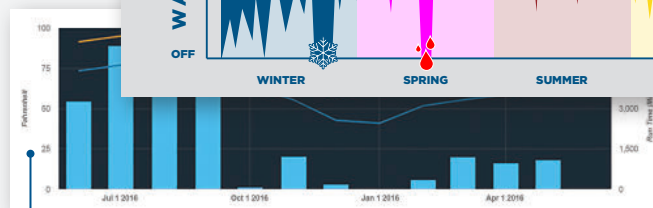

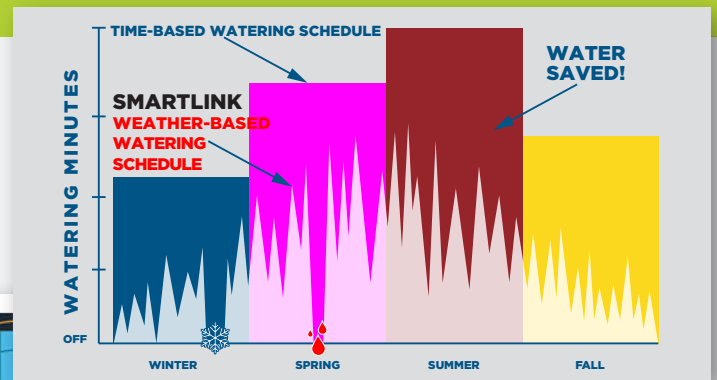

**What does it cost?** As a Weathermatic Premier Partner, we can now offer the equipment upgrades and enhanced service as part of our regular service contract. You will be cash flow positive as early as day-one!

## SmartLine Controller and Weather Station

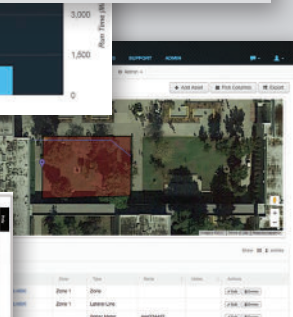

- Controller makes daily water adjustments based on:
  - high/low temperature
  - humidity
  - plant type
  - soil type
  - sprinkler type
  - slope
- Weather station set at each controller and communicates wirelessly
- Meets EPA Water Sense Criteria

## SmartLink Software

- Uses cellular communication & Amazon Cloud
- Programming changes can be made remotely from any web enabled device
- In-depth reports of run times and weather data
- Asset tagging and zone mapping
- Web based inspection reports with photo documentation
- Daily alert reporting

Program	Zone	Run Time	Weather	Status
1	1010	0:00	Clear	Running
2	1010	0:00	Clear	Running
3	1010	0:00	Clear	Running
4	1010	0:00	Clear	Running
5	1010	0:00	Clear	Running

## You'll Participate in #SaveWaterGiveLife, a Global Water Initiative

As a client, your organization, stakeholders and others will participate in this inspiring program that works in thirsty communities to provide **one lifetime supply of water for one person for every smart controller we install.**
